What would we do without our cell phones nowadays? Among all of the thousands of smart phone applications, there is a large percentage that is focused towards businesses and business owners. These apps range from billing & payment solutions, note-taking & assistants, to password storage & business card collecting, there is an app for just about every task.

We recently shared [our favorite](#) applications that we love and use on a daily basis.. then, we asked to hear what your favorites were. These were the most mentioned apps:

[Sage billing boss](#) – helps small business owners create, send & track the status of invoices

[Sage payment boss](#) – help small businesses get paid anytime & anywhere

[BuddyGuard](#) – streams your GPS location, audio, and images to a secure server

[Expensify](#) - imports expenses and receipts straight from your credit card or bank account

[Google Maps](#) – use GPS to find your location and directions to any address

[Evernote](#) – make voice notes, written notes, take snapshots or even record a location

[Siri](#) – a personal assistant to help life make sense

[Dragon for Dictation](#) – press record & send as an email or SMS, upload on Twitter or Facebook, etc.

Check these out & make life a little simpler =)

We always appreciate those that share their thoughts and ideas with us, below are some of the people responsible for the applications named above.
